

# Data Report: March 2022

## (showing data to the end of February 2022)

This report provides data on Foodbank use from 2019 to the present.

### Key messages from the data:

- In every month since October last year, the number of visits each month has shown an increase from the previous year. In February 2022 we had nearly 15% more visits than in February 2021; in January 2022 we had over 12% more visits than the previous January.
- Previously we have noted that the number of client visits had remained between 1000 and 1200 since the beginning of 2019, other than the clear exceptions in April – June 2020, the months of the tightest lockdown restrictions. However, in every month since October 2021, we have had more than 1200 client visits per month.
- We and many other foodbanks had predicted that the reduction in Universal Credit last October, and the increase in energy prices and the overall cost of living would lead to an increase in demand in our services. Since October it looks like the predicted impact has been evident.
- As the graph at the top of page 2 shows, over the past 3 years we have had less visits in February than in January. This is likely explained by February being a shorter month and because in January, people are more likely to have particular difficulties with their finances after Christmas. Although there was an overall decrease in the number of client visits in February, the number of family parcels showed the least reduction; the number of parcels for couples showed the greatest reduction. This is shown on the graph at the foot of page 3.
- Since the end of March 2021, we have recorded the number of adults and children who we are providing with food – since then, 36% of those people receiving food from us were children. However, that percentage has decreased from 39% in April 2021 to 33% in both January and February 2022.
- The percentage of children receiving food in our various distribution points varies from around 25 - 29% in New Volunteer House and Burntisland, to 39% in Viewforth (although that reduced to 34% in February).
- Although there was an overall decrease in client visits in February, that was not seen in all of our distribution centres: Linton Lane showed a decrease, while there was an increase at both Burntisland and New Volunteer House.
- The graphs on page 6 shows the number of different parcel sizes we gave out in both February and in the whole of 2022 at each of our distribution centres. It shows a clear difference in the proportion of family parcels given out – more than any other kind at Viewforth, but the least we gave out at New Volunteer House and Burntisland.
- The table on page 7 is a new set of data, repeating data that we previously obtained prior to 2020. It shows how often clients have been coming to the foodbank. The initial table shows how often clients came to the foodbank in 2021. Particular figures to note from the table are:
  - 72% of our clients visited 5 times or less
  - 82% of our clients visited 10 times or less
  - 92% of our clients visited 20 times or less
  - Just under 2% of our clients (42 in total) visited 50 times or more – the visits by these 42 clients accounted for nearly 20% of our total visits
  - 2186 individual clients made 14843 visits to the foodbank in 2021.

**Table and graph showing number of visits in 2020, 2021 and 2022 —the table also shows the change from the same month in the previous year as a percentage**

**NUMBER OF VISITS (not including those for extras only)**

	2020	2021	2022	% change from 2021
January	1053	1179	1325	12.4%
February	999	1114	1278	14.7%
March	1083	1153		
April	1461	1138		
May	1327	1095		
June	1355	1027		
July	1089	1057		
August	1018	1129		
September	1044	1202

November	1299	1370		
December	1161	1239		

**Graphs and table showing the different parcel sizes given out and the total number of meals provided in 2020—2022 (table and one graph on next page)**

(NB the total number of meals figure is calculated by multiplying the number of parcels x size of parcel (single, couple or family etc) x 3 days x 3 meals a day. Therefore it is an indicative and not exact figure. As 'Extras only' means that a full parcel was not given on that visit, they have not been taken into account in calculating the total number of meals or people provided with food.)

**Graph showing the total number of meals provided**

**Graph showing the different parcel sizes given out: 2020—2022**

Tables showing the total number of adults and children provided with food and the numbers at each distribution point (since April 2021, we have been recording the number of adults and children that we are providing with food)

NB: as the adults and children may be provided with food more than once in the month, this is not a count of the total number of individual adults and children we have helped.
